

Empowering your business  
to raise compliance

**CERPASS®**

CompliantERP Assurance  
Brought to you by CompliantERP

## Safeguard your core SAP Applications

Take the complexity out of managing SAP application access risk, making raising compliance simple and effective. CERPASS® is for businesses needing a practical and efficient GRC tool to support the compliant operation of their core SAP applications.

Access risk for SAP applications isn't just for the big end of town. Now there's an easy solution for businesses that don't have specialist resources and enterprise-sized budgets.

### Save time, reduce risk

Get the compliance capability you need, quickly and easily. CERPASS® is built to make SAP compliance processes simple and effective, placing critical risk information in the hands of analysts and decision-makers.

### Quick time to value

Achieve rapid time to value with minimal configuration or specialist skills required. Have confidence in decision-making through clear risk identification, customisable ruleset, and real-time reporting dashboards.

### Always up to date

Trust the technical backing of CERPASS®. It is built on the SAP Business Technology Platform, utilising a multi-tenancy architecture which ensures you are always running the latest version of CERPASS® and benefiting from our comprehensive roadmap.

### Real time insights

Reporting dashboards give real-time insights into risk position, causing and usage information and trends. Built on SAP Hana, CERPASS® reporting and analytics is fast and accurate.
